IMTN POUCHMASTER

HORIZONTAL FORM FILL SEAL SERIES

IMTN Pouchmaster HFFS Machine

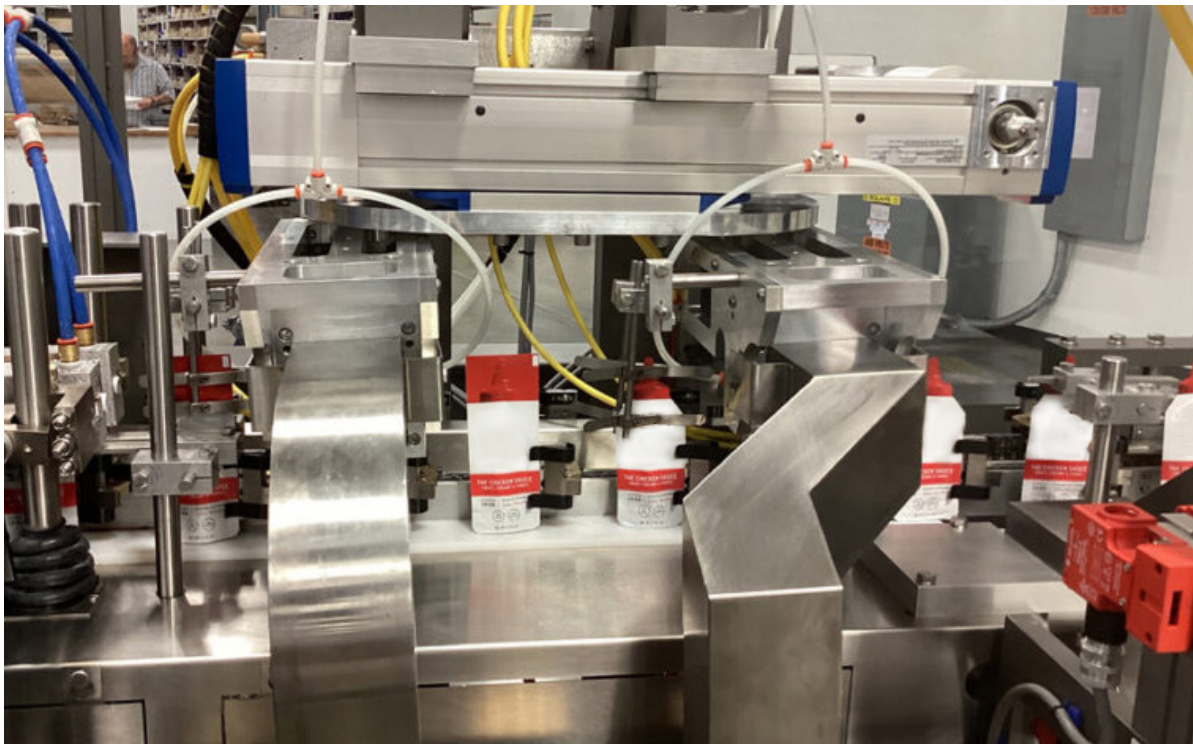

The IMTN Pouchmaster horizontal form fill seal series provides high speed filling of liquid products with top die cut in the most flexible machine design available on the market today. Speeds up to 110 ppm 1-Up are frequently observed with many liquids.

- Increased fill time per pouch cycle, which increases bag making and filling speeds.
- A product transfer diving nozzle servo system indexing at the same rate as the pouch index which inserts a traveling diving nozzle into the top of each pouch.
- Improved pouch material handling via power web unwind system (option).
- Longer fill times as the nozzle travels with the pouch over 4 cycles.

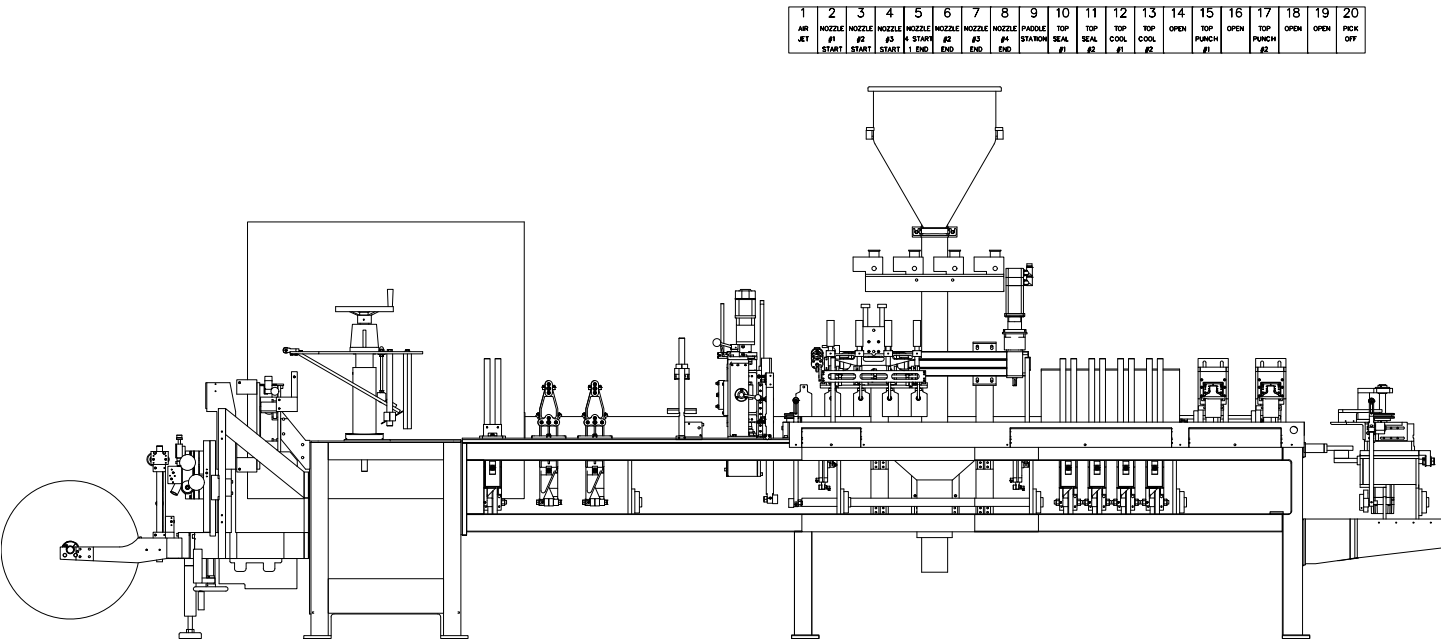

The IMTN Pouchmaster supports personal care products including viscous products such as gels, shampoos, conditioners as well as food products such as energy gels.

A servo-driven transfer diving nozzle indexes in sync with the pouch index, inserting a traveling diving nozzle into the top of each pouch for precise filling accuracy.

CONFIGURATION

800-423-4198

Contact HMC to learn about packaging machinery tailored to your unique requirements.

DIMENSIONS

Length	varies depending on model and number of fill stations
Height	7 feet
Depth	5 feet
Weight	5,000 lbs

MACHINE SPECIFICATIONS

Maximum Output	IMTN5 - 110 pouch/min IMTN7 - 80 pouch/min
Pouch Sizes	IMTN5 - 2" x 2" to 3.75" x 9.5" IMTN7 - 2" x 2" to 5.75" x 9.5"
Core Diameter	3" or 6"
Max Roll Diameter	19"

About HMC Products

HMC Products, a ProMach product brand, designs, fabricates, and installs both new and rebuilt horizontal form fill seal (HFFS) machines. These flexible packaging solutions serve a wide range of industries, including snack food, food, cosmetic, healthcare, pharmaceutical, and household goods.

Known for its exceptional service, HMC specializes in refurbishing and converting existing systems to extend the life of equipment.

More than 40 years ago, HMC began supporting customers with responsive parts distribution and service for pouch machines. Today, the company stocks more than 3,000 different HFFS machine parts and maintains more than \$1.5 million in parts inventory.

With over 20 CNC machining centers at our 60,000 square foot manufacturing facility in Machesney Park, Illinois, HMC provides low-cost and quick-turnaround solutions for all your poucher needs.
