IMF POUCHING MACHINE

HORIZONTAL FORM FILL SEAL SERIES

High-Speed HFFS Packaging for Free-Flowing Products

The IMF Pouchmaster horizontal form fill seal series is engineered for high-speed packaging of free-flowing products, including powders and particulates, at speeds up to 160 pouches per minute. Its servo-driven traveling funnel system moves in sync with the pouch, providing increased fill time and enabling product to be filled across multiple stations for greater speed and control.

By guiding product directly into the pouch, the traveling funnel also helps reduce product in the seal area for improved package integrity and less waste. Simple changeovers and flexible product handling make the IMF Pouchmaster a reliable solution for manufacturers looking to maximize throughput without sacrificing package quality.

High-speed pouching with greater fill control and speeds up to 160 pouches per minute.

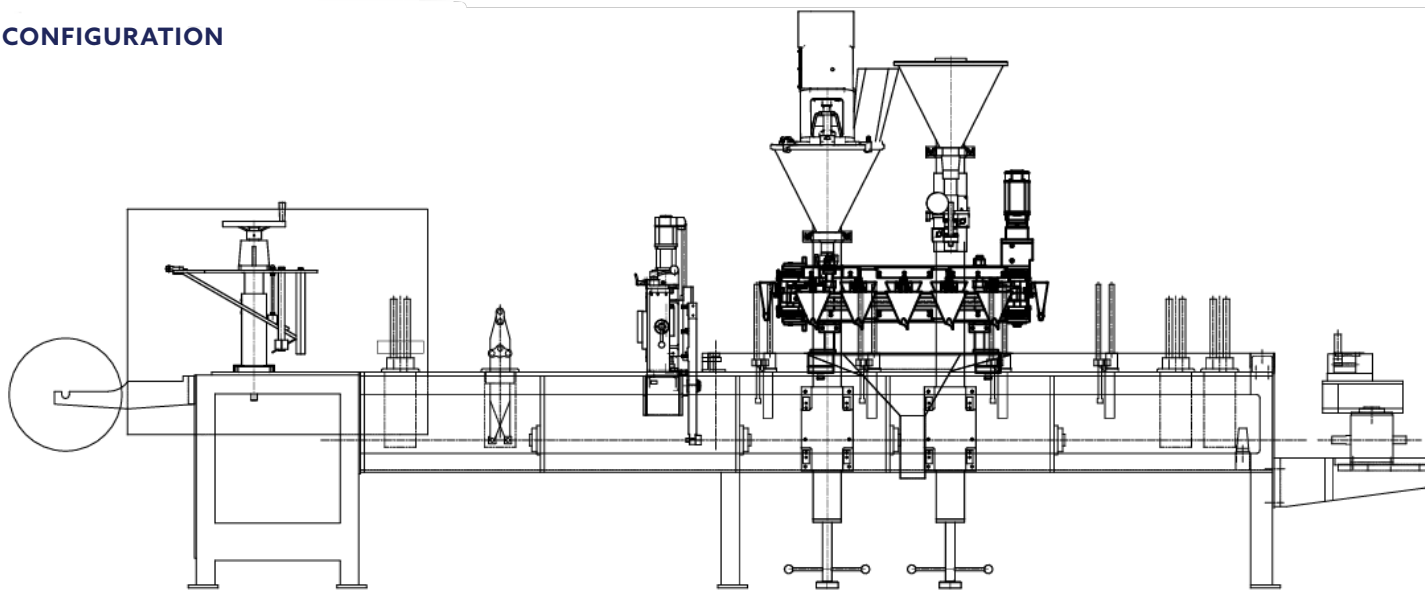

FEATURES & BENEFITS

- Speeds up to 160 pouches per minute
- Servo-driven traveling funnel system
- Extended filling time across 4 to 6 stations
- Larger filler tooling for faster product dispensing
- Helps reduce product-in-seal issues
- Improved package integrity and reduced waste
- Simple, fast changeovers
- Optional power web unwind

IDEAL PRODUCTS

- Snacks
- Sugar
- Gum
- Oats
- Powders
- Particulates
- Cough drops
- Other free-flowing products

CONFIGURATION

800-423-4198

DIMENSIONS & SPECIFICATIONS

	IMF7	IMF9
Pouch Width	76–150 mm (3.0–5.9 in)	76–196 mm (3.0–7.7 in)
Pouch Height	76–240 mm (3.0–9.4 in)	76–240 mm (3.0–9.4 in)
Weight	1.5 lb (0.68 kg)	
Speed	160 pouches/min	

HMC Products designs and builds horizontal pouch form fill seal systems capable of producing 3-side seal, 4-side seal, gusseted, and stand-up gusset formats for a variety of markets. Built around the principle of adaptability, HMC Products develops flexible machine platforms that match specific product requirements and operational goals while minimizing delivery timelines. Whether handling powders, liquids, or small solid items, HMC Products' pouch filling systems integrate a broad selection of options, pouch fitments, and closure solutions to support a wide range of applications.

In addition to new equipment, HMC Products offers expert rebuild services for horizontal pouch form-fill-and-seal systems, restoring and upgrading existing machines to extend service life, improve performance, and align with current production demands. Backed by an experienced service team and a comprehensive parts inventory, HMC Products delivers dependable support and rapid response throughout the entire lifecycle of its equipment.

HMC Products is a product brand of ProMach, a global leader in processing and packaging line solutions. As part of the ProMach Flexibles & Trays business line, HMC Products helps our packaging customers protect their reputation and build consumer trust. ProMach is performance, and the proof is in every package. Learn more about HMC Products at www.HMCProducts.com and more about ProMach at www.ProMachBuilt.com.
